

# 10 Fashion Tech companies to watch in 2020

"Fashion is an eternal cycle"... so is innovation in retail. In 2019, the U.K.'s fashion industry was worth £60 billion and is the number one creative sector. Eager to ease user experience for both retailers and customers, new startups are being created, investing massive efforts in enhancing AI, tools and user experience. Here's a glimpse of some fashiontech startups to watch in 2020.

---

Created by José Neves in 2007 and headquartered in London, Farfetch is a marketplace that sells products from over 700 boutiques and brands from around the world. Farfetch enables fashionistas anywhere in the world to shop for a unique range of products from the world's best fashion brands and boutiques. Farfetch displays over 3,000 different brands on its website and ships to 190 countries around the world. Farfetch's mission is to become the first global fashion tech platform for luxury fashion, connecting creations, curators, and consumers.

Founded in 2015, LovetheSales.com is the result of an ambitious idea from Mark Solomon and David Bishop. The concept? An online platform gathering all the sales in one place, from a thousand retailers worldwide. This way, customers can find the best offers on the web, whether it's clothes or home textiles. They can also set alerts to know when their favourite items go on sale. LVS' mission is to make the retail industry more sustainable by decreasing the 92 million tonnes of waste produced by the fashion industry every year as a result of unsold stock.

NearSt observed that "83% of shoppers would prefer to shop in-store instead of online if they know an item is available in a nearby store." To satisfy this demand, in 2015 Nick Brackenbury and Max Kreijn decided to develop a shop finder that shows nearby shops whose process is simple. Thanks to NearLive technology, the user is connected to any shop inventory system and the raw stock turns into quality live inventory. NearSt believes that Real-Time Local Inventory data and fashion tech will transform the way the world thinks about retail.

Many companies face inventory challenges, an expensive issue for organizations across different industries including fashion and apparel. In the fashion retail industry, excess inventory is wrongly anticipated. Thought by Ronen Lazar and Charlie Ifrah in 2013, Inturn is an enterprise platform that streamlines workflows, optimizes margins and protects the brand.
