

7 tech startups to watch in and around Exeter

Nestled in the beautiful coastal region of Devon and Cornwall and on the so-called English Riviera, Exeter is a vibrant and dynamic hub for young talent thriving to make a difference and play a part in the nation's digital transformation.

With a variety of university resources and incubator programmes specifically designed to help startups, more and more entrepreneurs are launching innovative businesses in and around Exeter. Some of them – such as the renowned crowdfunding leader Crowdcube – are now set on global markets.

Maddyness has selected some of the most talented startups in tech to watch in Exeter and its surroundings.

Since 2010, Crowdcube has been a leading equity crowdfunding platform helping entrepreneurs, startups and growing businesses to connect with potential investors. Dedicated to helping UK-based entrepreneurs raise finance to start or grow their business, Crowdcube gives investors real equity in the companies they fund and uses the web-based notion of ‘crowdfunding’ where a community of like-minded people pool their money and knowledge together to back an idea, business or person.

We're launching a new online event! Ask The

*Founders launches next Thursday with @AirVehicles, @ZoomEV18 and @CatchAppMe. Get your free ticket ☐☐ *capital at risk* <https://t.co/fQpX32iD8S> <pic.twitter.com/7TiTpgOPdf>*

Attomarker Ltd is a biotech spinout developing a platform incorporating mobile technology to offer low-cost, non-invasive, high-speed and multiplexed blood testing. In the traditional healthcare model, hospital blood testing requires a tube of blood from the arm and results are given in hours to days. Blood must be taken by a professional and the entire process requires at least two consultations.

Attomarker has improved its 7 minute #COVID19 #antibodytest through additional detection of four flu antibodies to aid in diagnosis during the upcoming flu season. See the latest @CGTN interview with our CEO, Prof Andrew Shaw, here: [@CGTNEurope](https://t.co/EPF8dVklzR)

Founded in 2017 in Cornwall by Dr Hasan Baig, Build Solar has developed an innovative building integrated photovoltaic “Solar Squared” that provides combined benefits of electricity, thermal insulation and daylighting. Solar Squared integrates standard photovoltaic cells into a modified glass block design and transforms it into an energy harvesting construction material. The technology uses optical solar concentrator to redirect light onto smaller sized solar cells. Different designs of the product allow a variable range of electricity and daylighting.
