

Languagetech: 10 startups transforming language learning in the UK

As the language learning market is estimated to be valued up to £21.4B by 2025, we compiled a list of some of the most innovative UK-based language tech companies highlighting the latest tools and services helping people to learn a new language.

Since 2010, Memrise has specialised in combining cognitive science, powerful tech and entertaining content to make language learning genuinely recreational. This language tech offers 200 language combinations across 24 languages on their website, iOS and Android apps. Combining brain science and humour, the company aims to enrich people's consciousness and help people achieve confident, real-world language skills in just a few short months.

Discover Memrise

Fluentify is a fast-growing language learning startup based in London, offering 30-minute one-to-one video sessions with qualified mother-tongue English tutors, via their secure, integrated video conferencing platform. The platform is available 24/7, which means you can learn any time you want from your computer, tablet or phone. The platform envisions the creation of a personalised learning plan based on your level and goals, as well as tools for monitoring your progress. To date they have raised \$2.3M.
